

## Five good reasons to invest in fire extinguisher training

- Most people have never used a fire extinguisher. Training gives you the confidence to tackle a small fire and the skills to do so safely and effectively
- When fire breaks out, time is critical. You have only seconds to react before it can become a catastrophe
- Using the wrong type of extinguisher on a fire can be a recipe for disaster. Your team needs to know the difference between the right and wrong type
- You're protecting your staff and possibly preventing major loss and business interruption – a small fire can have a huge impact
- It is an essential part of a comprehensive workplace Health and Safety plan and a requirement for many Health & Safety Accreditation Processes

## Testimonials

"All Fire Safety stood out above the other providers due to the ability to provide practical as well as theory training. The delivery of the training was engaging, relevant and fun."

**Colin Robson**  
Director, HTS Group Ltd

"As a dangerous goods 3PL provider it is essential that my staff can use the fire fighting equipment efficiently. They were recommended to me and I was impressed with the degree of sophistication of the equipment used in the training."

**Graham Boyes**  
Site Manager, Chempro, Wellington

"It is company policy to train our staff in the use of hand operated fire fighting equipment. We booked them again because we were happy with the training they provided last time. It was easy to arrange."

**Lucas Schempers**  
Online Security Services

"The Wellington Institute of Technology School of Hospitality operates a number of programmes, some of which require Fire Training as part of the Work Safety components. They certainly met all of our requirements to supply both theoretical and practical training and also provide the necessary learning support materials and certification. They work with the School with a great degree of flexibility."

I would certainly recommend them to any business as a very accommodating and professional company with to the point training which is contextualised with different situations when needed."

# What would happen if you had a **fire at work** today?

## Fire extinguisher training

**ALL FIRE SAFETY**  
THE FIRE PROTECTION EXPERTS

**If a small fire broke out today,** would you and your staff know how to extinguish it safely and effectively? Because a small fire can very rapidly get out of control, there is no time to waste reading instructions and thinking about what to do. You need to react quickly and confidently without putting yourself or others in danger.

**Fire extinguisher training will teach you to do that.**

## What will you learn?

- **Extinguisher types**  
What type of extinguisher to use safely on what types of fire
- **Hands on practice**  
Putting out a real fire using an extinguisher with instruction on the correct technique
- **Fire hoses and fire blankets**  
How and when to use these
- **Keeping safe**  
Steps to take when you discover a fire and how to keep yourself and others safe when fighting it
- **Fire science**  
Basic fire chemistry and behaviour
- **Fire risk**  
Identifying and managing specific fire risks in your workplace

## Why use All Fire Safety?

- We have over a decade's experience training people across a wide range of industries and workplaces
- Our computerised gas-fired simulator allows trainees to practice using extinguishers on live fire. It assesses whether you are using the correct technique plus it's clean and very safe
- We're experts in the fire protection industry – we install and service thousands of extinguishers every year
- Training can be customised to your needs and industry
- You'll be trained by a registered NZQA Assessor
- We can come to you – or can arrange off site training
